WITH MOBILE BUILDING MATERIAL RECYCLING

RM70 GO!

COMPACT RECYCLING FOR WINNERS

RUBBLE MASTER[®]
COMPACT RECYCLER

You have a construction, demolition or haulage company, are an earth-mover, disposal company or producer of building materials?

You don't want to leave your money at the dump anymore and want to earn additional profits from recycling rubble instead?

You want an all-round solution that will make recycling easy and profitable for you from the word "go"?

When are you going to start?

With the RM70 GO! you too can earn money from rubble recycling both easily and reliably!

BUY! START! EARN MONEY!

THE IDEAL SOLUTION FOR
NEWCOMERS TO RECYCLING

COMPACT | **MOBILE** | **USER-FRIENDLY** | **PROFITABLE**

The RM70 GO! has by far exceeded my expectations. Its production-to-weight ratio is unmatched.

D.J. Cavaliere, COR Equipment Sales

"GO!" means that we support customers to such an extent that all they have to do is literally push the button to be successful!

Gerald Hanisch, RUBBLE MASTER founder and CEO

RM70 GO!

Powerful and profitable:

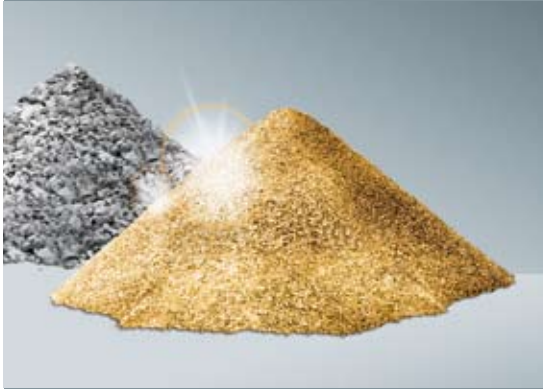

Up to 120 t/h throughput with transport weight of 21.5 Tons. Low operating costs, only 3.96 gal/hr of diesel consumption, rapid amortisation.

Compact and mobile:

From cramped inner-city job sites to mountainous terrain – mobile and no special transport permits required thanks to convenient low loader compatibility; unloaded and ready for action in 10 minutes with remote control; self-driven around job site.

Easy operation:

Intuitive user interface for straight forward and reliable handling from the very beginning; clearly described maintenance cycles at defined points; cost-efficient single-person operation.

RUBBLE RECYCLING FOR EVERYONE

Usable immediately, flexible in terms of feed material.

Quiet-as-a-whisper operation ensures highest acceptance in all environments.

Transport to any job site quick and easy.

CLEAR BENEFITS

PAY OFF WITH EVERY JOB.

– Extremely versatile:

Ideal for processing rubble, asphalt, concrete, medium-hard natural stone and convert it into high-value construction materials. Reliable magnetic separator removes all metal parts from the value grain.

– Inexpensive to operate:

Uniquely economic and efficient through diesel/electric drive concept and sophisticated RUBBLE MASTER technology.

– Defined value grain in a single pass:

In combination with the unique, mobile oversized grain separator (OS), fitted easily to the crusher's main discharge belt using quick-release levers.

– High acceptance:

Quiet as a whisper, low emission, with optimum dust suppression, welcomed by machine operators, residents and environmental agencies.

– No-nonsense maintenance:

Clearly described maintenance cycles at defined points make life easier for the operator and ensure optimum machine service. All key components can be maintained easily from ground level.

– Nothing could be simpler!

Universal colour coding for all functions (start, service, help) makes handling easier – so the machine can be operated reliably and at a profit from the day one.

MORE THAN A MACHINE

THE "ALL-INCLUSIVE" PACKAGE FOR
SUCCESS WITH RUBBLE RECYCLING

THE RUBBLE MASTER GO! PRINCIPLE

Unique to the brand, the RUBBLE MASTER GO! principle offers every single customer – and above all every newcomer a complete business model, including the necessary reliability for success with rubble recycling through top products and top service.

- Advice on optimum settings for the respective job site
- Assistance in obtaining permits
- Amortisation calculation
- Advice on how to sell the recycled construction materials at a profit

LIFETIME SUPPORT INCLUDED

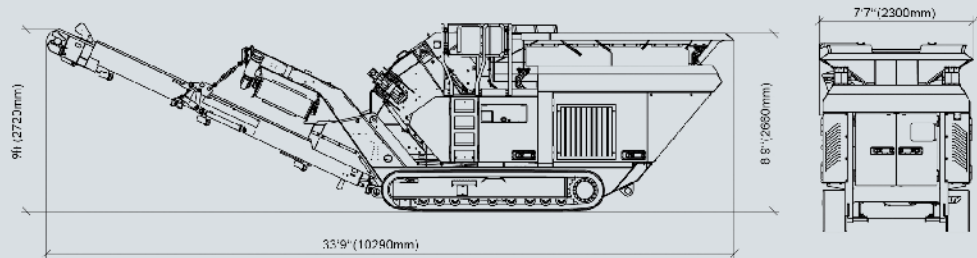

The recycling specialists at the RUBBLE MASTER headquarters and experienced, highly trained regional sales and service partners ensure perfect after sales and service support throughout the entire lifetime of the machine. This includes:

- Extensive training
- Continuous on-site support
- Assistance in site organisation
- Service interval reminder
- Cost-saving updates

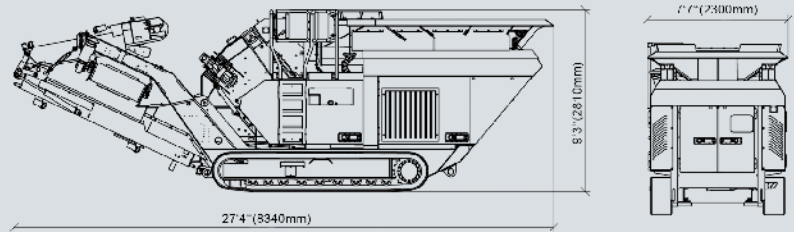

WHEN ARE YOU GOING TO START?

We would be pleased to assist you in doing so. Contact us!

RM70 GO! – impact crusher with crawler gear

Throughput	Up to 120 t/h, depending on material
Feed size	Edge length max. 25" (600 mm)
Inlet opening	30" x 24" (760 x 600 mm)
Crusher unit	HMH impact crusher with 2 or 4 hammers
Operation	One operator using radio control for crushing and manoeuvring operations
Feed unit	Asymmetric 2.6 cubic yards (2 m ³) vibro-channel with two 3.1 kW vibrator motors Hopper dimension length 8'3" width 6' (2,500 x 1,800 mm) Feed Control System for automatic conveying in line with crusher load Wear-resistant Hardox 400 cladding
Pre-screening	Efficient pre-screening using bar mesh screen Screen area 40" x 28" (1,000 x 700 mm) Output on main discharge conveyor via fully integrated bypass chute
Discharge belt crushed material	Folding conveyor 32" (800 mm) wide, folds into transport position hydraulically Discharge height 9' (2,720 mm)
Drive unit	Deutz Diesel engine, 4 cylinder 140 HP at 2,150 rpm TIER 3a/COM IIIa approved Synchronous generator 32 kw 400 V 230 V and 400 V outlets for external drives up to 12 kVA
Release System	RUBBLE MASTER "RELEASE SYSTEM" operated via wireless remote control to remove blockages inside crusher
Magnetic separator	Extra strong magnet with left/right function, belt width 32" (800 mm)
Transport system	Crawler gear
Weight	43000 lbs, 21.5 Tons (19,500 kg)
Options	Dust supression using water spray inside crusher and at outlet Filling pump Crusher hammer changing system Emergency control pendant Central lubrication system Subfloor

Specifications subject to change in line with technical developments.
