INNOVATION AND CONTROL.

RM GO! SMART

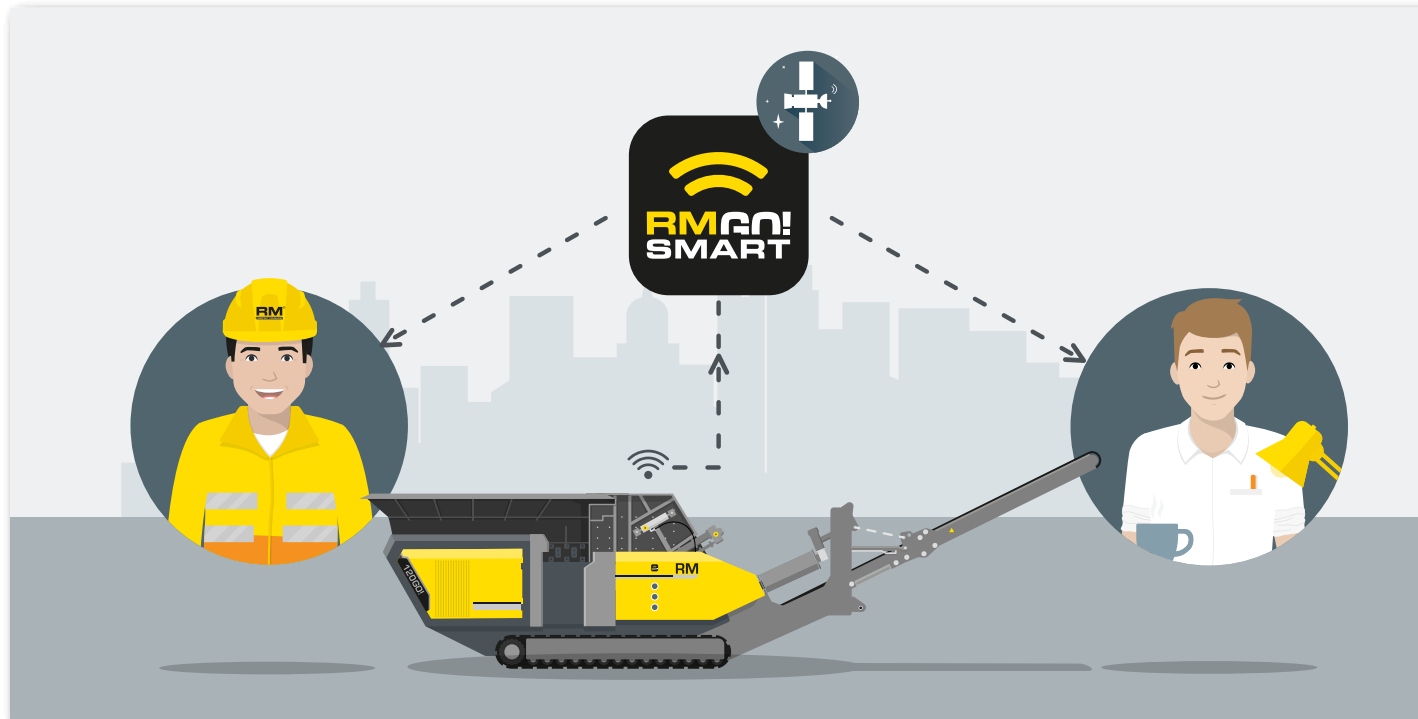

# RM GO! SMART

THE NEW DIMENSION IN SERVICE INNOVATION AND CONTROL.

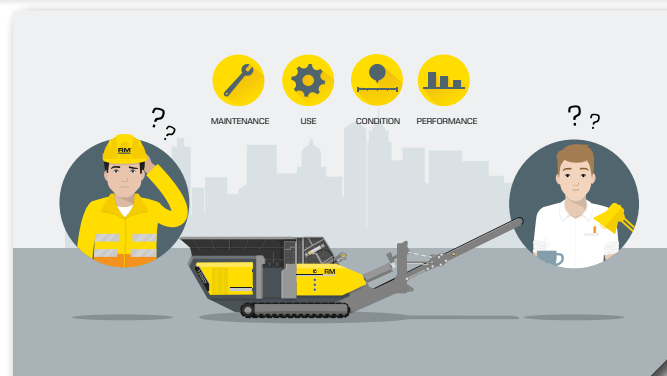

## WHAT IS RM GO! SMART?

An app for smartphone and tablet which makes the maintenance and performance analysis of your mobile crusher easier and more accessible than ever before!

Peter is happy with his mobile RM crusher. Because it crushes construction and demolition waste, asphalt, concrete and natural stone with no trouble at all.

Sometimes, however, it would be good to have more detailed information about the condition and the performance of the machine. Daniel is in a similar position. He is the owner of the machine and has to plan the use and maintenance of the mobile crusher.

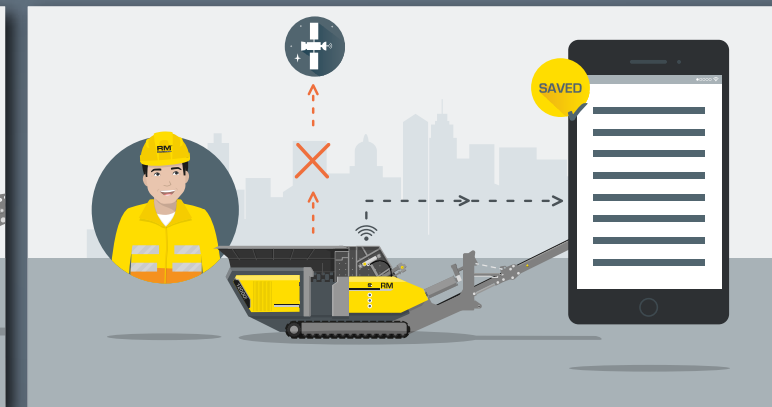

If only you could access all the key information concerning the machine... This is exactly what we thought, so we developed a comprehensive solution: RM GO! SMART.

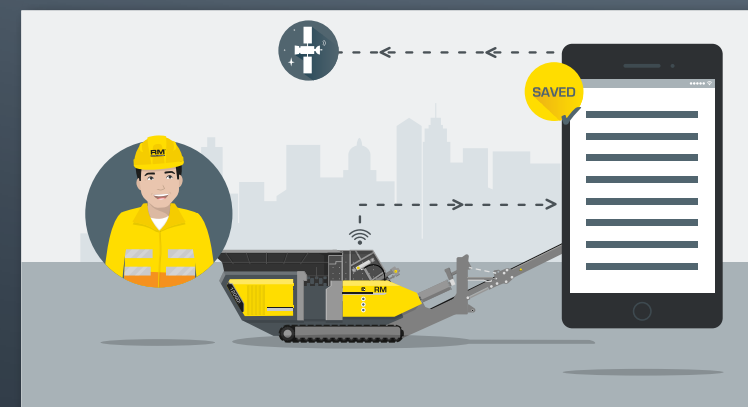

An app for smartphone and tablet which makes the maintenance and performance analysis of your mobile crusher easier and more accessible than ever before! The app provides you with live data about the condition of your machine at any time on site, generates daily reports automatically and, in the event of a problem, sends you an error code together with instructions on how to remedy it.

This means that Peter can adapt the machine in an optimum way for the current requirements, carry out maintenance and achieve maximum efficiency – and do so independently of the network coverage at the time.

Because, in the event of there being no active mobile connection, all the data which is recorded is saved on the mobile device temporarily via WiFi.

As soon as there is a connection again with a mobile network all the data is synchronised with the central server.

And this is also good news for Daniel, because he can rest assured that his crusher is making maximum profit and any downtime is kept to a minimum.

Welcome! to our world

## RM GO! SMART

RM GO! SMART represents a new era in the interaction between humans and machines. The infrastructure we developed for this system not only promotes intelligent operation of the machine, but also enables remote processing and display of real-time trends and historical data. You can use mobile devices like smartphones and tablets to visualise and process the information. As a result, you have barrier-free access to your data and you remain mobile on the job site. RM GO! SMART is an ideal extension to the proven RM GO! Principle, which is appreciated by customers all over the world for its simplicity and intuitiveness.

RUBBLE MASTER has proven yet again what it means to implement solutions that answer real customer needs. RM GO! SMART opens up a new era of possibilities and service opportunities.

### BENEFITS

#### OPERATOR

- Display real-time data
- Suggestions for application optimisation
- Prompted troubleshooting routines
- Reducing or avoiding possible downtimes

#### OWNER

- Increasing cost effectiveness
- Better plannability e.g. for rentals
- Less risk of downtime
- GPS Tracking
- No extra investment needed in expensive hardware or software e.g. fleet management systems

#### SERVICE TECHNICIAN

- Comprehensive information before service call
- Reminder before service due
- Prompted servicing and maintenance routines
- Home to Base – RM Support

### RM GO! SMART FEATURES

- Visualisation of live operating data and historical data
- Automated creation and transmission of daily and monthly reports
- Text and image prompted troubleshooting routines
- Home to Base - RM experts provide you with support to get the most out of your machine
- QR-Code scan function to obtain more information on machine and parts at any time
