GO! SMART

THE NEW DIMENSION IN SERVICE

Welcome! to our world

What are you waiting for?

Get the smart solutions from RUBBLE MASTER now!

RM GO! SMART represents a new era in the interaction between humans and machines. The infrastructure we developed for this system not only promotes intelligent operation of the machine, but also enables remote processing and display of real-time trends and historical data. A GSM/UMTS connection is not absolutely essential because the data can be saved temporarily on the device. You can use mobile devices like smartphones and tablets to visualise and process the information. As a result, you have barrier-free access to your data and you remain mobile on the job site. RM GO! SMART is an ideal extension to the proven RM GO! Principle, which is appreciated by customers all over the world for its simplicity and intuitiveness.

BENEFITS
